Moreover, the emergence of new technologies present challenges and opportunities for integration with existing plans. This webinar will use recent events, large and small, to illustrate the importance of updating your business continuity plans as part of effective risk management processes.

Because financial institutions play a crucial role in the overall economy, disruptions in service need to be minimized in order to maintain public trust and confidence in the financial system. As such, federal and state banking, credit union and securities regulations require all financial institutions to implement a business continuity plan. Use this webinar to review the adequacy of your business continuity plan and compliance with examiner expectations, before the next disaster strikes!
