- In-house Legal Counsel

Presented by Counsel for Bankers' Compliance Group®
ALDRICH & BONNEFIN, PLC

Since the adoption of the Gramm-Leach-Bliley Act in 1999 (GLBA), information security breaches have become commonplace but are, if anything, becoming more terrifying. Breaches of data systems can expose a financial institution to regulatory criticism, civil liability and reputation risk. The banking regulators were prescient in seeing that security breaches are inevitable. While efforts must be made to prevent them, the real focus of examiners is not on prevention but on response. This webinar will address the do's and don'ts of responding to an information security breach at a depository institution.

Highlighted areas will include:

- What is a "breach" of the system?
- What laws and regulations apply to information security breaches?
- What is a security breach response program and why should I have one?
- What should my response program contain?
- When must I notify my customers of a breach?
- What must a notification letter contain?
- Must we buy identity theft protection for customers affected by a breach?
- Are businesses protected by the laws on information security or only consumers?
